RELOCATION GUIDE

UPDATED FEBRUARY 2018

NORTH EAST PENNSYLVANIA
NORTH EAST AT A GLANCE

GET TO KNOW GRAPE COUNTRY
North East is located in Erie County, almost equidistant from Cleveland and Buffalo with Pittsburgh a short drive south. It’s bordered by the state of New York to the east and the City of Erie to the west. The most significant feature of the area is beautiful Lake Erie, which lies north of town and contributes not only to its beauty but its climate and tourism as well. The countryside is dotted with local wineries which owe their success largely to the unique grape growing climate of the area. A drive through the area would find serene beach front, sprawling vineyards and the historic downtown district.

CLIMATE
Lake Erie has a powerful and dramatic effect on the weather of North East; it acts to modify temperature extremes along shore: it helps warm the area during winter months and cool it during the summer. Lake-effect snow falls along the shoreline on a regular basis, but dumps much more snow inland in a Snow Belt area that runs from just south of Interstate 90 near Erie to Edinboro along Interstate 79.

Avg. yearly snowfall: 85.1 in.
Avg. seasonal temperatures:
Spring—46.4° F
Summer—69.4° F
Fall—53.5° F
Winter—27° F
